PROFESSIONAL SUMMARY

Computer Engineering student (Graduating 2028) with hands-on internship experience in software development and a strong foundation in full-stack development, cloud infrastructure, and DevOps automation. Proficient in building scalable MERN applications and deploying containerized workloads on AWS. Actively seeking internship and co-op opportunities to contribute to high-impact engineering teams.

WORK EXPERIENCE

Software Development Intern

January 2026 – March 2026

Indian Computer Technologies LLP – New Delhi, India

- Participated in the full software development lifecycle (SDLC) — including coding, testing, debugging, and deploying application features — reducing bug resolution time by 20% through systematic testing practices
- Collaborated with a cross-functional development team of 5+ engineers, delivering 3 assigned feature modules within sprint deadlines using Agile methodology
- Learned and applied 2 new technologies within the first month, demonstrating strong adaptability and a fast learning curve in a production environment

PROJECTS

Trace.ai – AI-Powered Code Review Platform

February 2026

MongoDB | Express.js | React.js | Node.js | REST APIs | Git

- Engineered a full-stack MERN AI code review platform that reduced code review turnaround time by 40% by enabling real-time inline feedback on pull requests
- Designed a scalable backend processing pipeline that improved concurrent request throughput by 3x and achieved sub-2-second API response times

DevOps Two-Tier Flask Application

March 2026

Python | Flask | MySQL | Docker | AWS EC2 | GitHub Actions | CI/CD

- Deployed a containerized Flask-MySQL application on AWS EC2, reducing infrastructure setup time by 60% through Docker containerization and automated provisioning
- Built a GitHub Actions CI/CD pipeline that reduced manual deployment steps from 12 to 2, achieving zero-downtime production releases

TagMaster – Real-Time Collaborative Data Annotation Platform

November 2025

MongoDB | Express.js | React.js | Node.js | WebSockets | JavaScript | Git

- Built a real-time collaborative annotation platform using WebSockets, supporting 10+ simultaneous users with role-based access control (RBAC), reducing annotation errors by 30%
- Optimized MongoDB queries and indexing strategies, improving data retrieval speed by 2x on datasets with over 10,000 records

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, C++

Web Technologies: React.js, Node.js, Express.js, Flask, HTML, CSS, REST APIs

Databases: MongoDB, MySQL, DynamoDB

Cloud & DevOps: AWS (EC2, S3, Lambda, SQS), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, CI/CD

Tools: Git, Postman, Figma, Elasticsearch, Kafka, WebSockets

EDUCATION

Bachelor of Technology in Computer Engineering

2024 – 2028

ITM (School of Future Tech) – Mumbai, India | SGPA: 9.0 / 10.0

CERTIFICATIONS

Professional Certificate in DevOps

2022

Full Stack Web Application Development

2022

VOLUNTEER EXPERIENCE

GDG Cloud Mumbai – Attended cloud and DevOps workshops; collaborated with engineers on real-world cloud architecture problem-solving sessions
